

IMPORTANT – before you start doing your solution, MUST do the following steps:

1. Create your MS SQL database named **PE_Se16_Su22** of 2 tables

ACCOUNT		
Column Name	Data Type	Description
Username	varchar(50)	Primary key
Password	varchar(50)	
Fullname	nvarchar(255)	
Role	bit	Admin (1) – User (0)
Status	bit	

PRODUCT		
Column Name	Data Type	Description
ProductID	int	Primary key, auto-increment
ProductName	nvarchar(50)	
Quantity	int	
Price	double	
Image	varchar(255)	Save the file name of the uploaded image
UserCreate	varchar(50)	The foreign key associated with Username in ACCOUNT table
DateCreate	Date	Get the current date when entering data

2. Set the home page/default for **login.jsp** page.

If you log in with the Admin role you can do it: Create/Read/Update/Delete data in table **ACCOUNT** and **PRODUCT** but can't delete my own account.

If you log in with the User role you can do it: Read/Update data in table **ACCOUNT** and Read data in table **PRODUCT**

Use session to store login account when switching pages and filter to authorize site use
